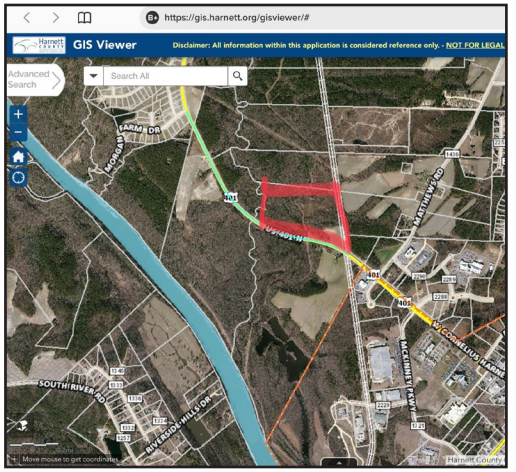
Harnett County Residents Against Highland Paving's Asphalt/Concrete Plant

PLEASE SIGN THE PETITION!



After unsuccessfully trying to establish an asphalt plant in Angier, Highland Paving has purchased 41 acres approximately 1/2 from Central Harnett Hospital by the railroad tracks. The land is about 1/2 wetlands, has a stream that drains into the Cape Fear River. There are also several established neighborhoods and developing neighborhoods within or at a 1-5 mile radius!

This land has been zoned industrial since the mid 1980s, long before the residential development of this areawas happening. Therefore there are no special use hearings, preventing community input.

Industrial waste & contamination from this type of industry can cause respiratory illnesses, cancer and otherdiseases. It also contaminates the soil, watershed, and the river.
