HARNETT COUNTY RESIDENTS AGAINST ASPHALT & CONCRETE PLANT

JOIN OUR FIGHT TO STOP THE HW 401 N. HIGHLAND PAVING ASPHALT PLANT!

- After unsuccessfully trying to establish an asphalt plant in Angier, **Highland Paving** has purchased 41 acres approximately 1/4 a mile from **Central Harnett Hospital** by the railroad tracks for a total of 1.25M.
- **Commissioner Lew Weatherspoon** and county officials from **Planning & Development** assisted Highland Paving in locating the property (The Daily Record).

Here are reasons to support this effort financially:

- Did you know that Harnett County homes within a 1-to-2-mile radius of the Highland Paving Asphalt Plant location will likely see their property values **decline by 10% or more?**
- Did you know Harnett County supplies drinking water not only within the county but also to 5 other counties and 14 municipalities (totaling approximately **125,000 customers within the county, 60,000 customers outside the county?**
- Did you know that there are still approximately **130 acres of Industrial zoned land** in the area adjacent to Highland Paving's property? That means that **ANY industrial business can purchase land and apply for permits.** No public rezoning hearing required!
- This 41-acre parcel of land has a flood zone of 19 acres and has wetlands that all drain into Neill's Creek, which drains into the Cape Fear River. Graphic shows Highland Paving's proximity to the Harnett County Regional Water Treatment plant.

Our Immediate and Long-Term Goals

1. To try to stop the **Highland Paving Asphalt Plant** from moving forward and operating at this location.
2. If the above is not achieved, we want to **prevent** the Highland Paving Asphalt Plant from expanding (capacity limits, manufacturing limits, production levels, operation hours/days/times, etc.) of their currently submitted plan of operation at this location.
3. To try to **change the zoning** on the adjoining parcels of land to something other than industrial.
4. To try to **change the language/law within the Harnett County Ordinances**, to create more restrictions on all industrial entities within our county, that emit or produce hazardous substances expelled into the ground, air, and water, due to their manufacturing processes.
